Sunflower Variety Description Summary Page

1. Origin & Breeding History

7PRWB65R is a high oleic oil type restorer line developed by Pioneer Hi-Bred International that derives from the backcross 7PGTQ64R*4/7PBHY67R//7PGTQ64R*4/7PULR86R; all are Pioneer proprietary lines. 7PULR86R is the high oleic donor line. Selections were made for fatty acid profile, oil content, shorter plant stature and high yield, as assessed in hybrid combination.

The pedigree method was used in the development of 7PRWB65R. It is a bulk of BC3F3 seed tracing back to a single BC3F2 selection. It is homozygous for dominant fertility restoration of the CMS PET 1 cytoplasm.
